LinkedIn | GitHub | Portfolio

CORE STACK

Languages: JavaScript ES6+, TypeScript, HTML5, CSS3

Frontend: React.js, Redux, Context API, Chart.js, Material UI

Backend: Node.js, Express.js, REST APIs, JWT, RBAC

Database: MongoDB, MySQL, PostgreSQL, Mongoose

Async: Background Jobs, Event-Driven Processing

DEVOPS & CLOUD

Containers: Docker, Docker Compose

AWS: EC2, S3, IAM, RDS, Lambda

CI/CD: GitHub Actions, Git, Linux

TESTING & DESIGN

Testing: Jest, React Testing Library, Postman

Architecture: System Design, MVC, Microservices, Caching

Tools: VS Code, Jira, Chrome DevTools, Agile/Scrum

RECOGNITION

- **Best Dedicated Employee** SysTools Software Pvt Ltd
- **2nd Place Techo-Enhancer Quiz** Inter-College
- **3rd Place Algofinity Challenge** Programming

EDUCATION

Master of Computer Applications (MCA)
Distinction
Jagannath University, May 2024

PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer with 3+ years** of experience delivering scalable MERN stack applications using **TypeScript, Node.js, React.js, Docker, and AWS**. Proficient in **async job processing, PostgreSQL/MySQL, Jest testing, and System Design**. Recognised as **Best Dedicated Employee** for consistent on-time delivery and zero critical post-release bugs across production systems.

PROFESSIONAL EXPERIENCE

Full Stack Developer

SysTools Software Pvt Ltd, Dwarka *Jul 2024 - Present*

- Architected HRMS and Cyber Case Management platforms using TypeScript, MERN stack, and RBAC, serving 200+ internal users with zero unauthorized access incidents
- Designed async job workflows for leave approvals, background screenshot processing, and automated reports, fully decoupled from synchronous request cycles
- Containerised all applications with Docker and Docker Compose, reducing developer onboarding time by 50% and eliminating environment inconsistencies
- Built Jest unit and integration test suites achieving 80%+ code coverage across all critical backend modules
- Applied System Design principles including caching, load balancing, and service decomposition, enabling APIs to handle 1,000+ concurrent requests reliably
- Deployed on AWS (EC2, S3, IAM, RDS) maintaining 99.9% uptime with scalable storage for 10,000+ documents
- Established GitHub Actions CI/CD pipelines, cutting deployment time by 60% with zero-downtime releases
- Optimised MongoDB and MySQL queries with advanced indexing strategies, improving API response times by 35% under high load
- Delivered React.js and Chart.js dashboards reducing manual reporting effort by 40%; built Chrome Extension saving approximately 5 hours per week
- Awarded Best Dedicated Employee, recognised company-wide for delivery excellence and cross-functional collaboration

Full Stack Developer Intern

SysTools Software Pvt Ltd, Dwarka *Apr 2024 - Jun 2024*

- Built 10+ RESTful APIs in TypeScript and Node.js contributing to 3 live production modules shipped to real users
- Implemented async processing for file uploads and batch data operations using Node.js event-driven patterns
- Jest test coverage and Postman API testing identified and resolved 20+ critical bugs before production release
- MongoDB and MySQL CRUD with query optimisation reducing average query execution time by 20%

MERN Stack Developer Intern

ManthanIT Solutions, Remote *Feb 2023 - Mar 2024*

- Built 3 full-stack web applications with JWT authentication, protected routes, session management, and Redux state management
- Delivered ticket booking system with async seat-lock logic handling 500+ test bookings during QA cycles
- Gained production-level experience in React.js component architecture, reusable UI components, and API integration

KEY PROJECTS

Work Monitoring System *TypeScript | React | Redux | Node.js | MongoDB | Docker | Jest*

Bachelor of Computer Applications (BCA)
Jagannath University, May 2022

CERTIFICATIONS

- MERN Stack Full Stack - VSIT, 2023
- Python & AI/ML Fundamentals - VSIT, 2023
- Docker for Developers (self-directed)

Real-time employee activity and screenshot tracking dashboard with async capture jobs and role-based admin/employee panels. Containerised with Docker Compose, 80%+ Jest coverage. Tracked 50+ employees with sub-2s dashboard load time.

HRMS Portal *TypeScript | MERN | AWS S3 | JWT | RBAC | Async Jobs | Docker*

End-to-end HR management system with async leave approval workflows, attendance tracking, and AWS S3 document storage. Deployed to 200+ production users with zero critical post-release bugs.

Cyber Case Management System *TypeScript | MERN | System Design | MongoDB Indexing*

Scalable role-based incident tracking with async search indexing, dynamic filters, and CSV export. Supports 1,000+ incident records with full-text MongoDB search.

QuizBuddy - Live Quiz and Polling App *TypeScript | MERN | Redux | Chart.js | Jest*

Real-time quiz and polling platform with JWT-secured login, Redux state management, analytics dashboard, and Jest test coverage. Supports 100+ concurrent user sessions.

ChatGuard - Chrome Extension *JavaScript | Chrome Extension APIs | DOM Manipulation*

WhatsApp Web privacy extension with chat blur and masking via DOM manipulation. Achieved 100+ installs with a 4.8-star rating on the Chrome Web Store.

Email Header Analyzer Tool *JavaScript | Node.js*

Automated email spoof detection via header parsing logic. Identifies mismatched sender domains and suspicious relay paths, significantly reducing manual security review time for SOC analysts.
